

Meijer Interview Coding Challenge:

Title	Product Information API & UI Implementation in MAUI mobile application.
Task 1:	Develop & Implement two Product API calls (Product API, Product Detail API) to retrieve, prepare data and display. The sample responses are in the next page
Task 2 (UI/UX):	Develop a MAUI App with One screen for Listing products summary with image icon, title, summary and Detail screen with full image, title, description, price and include a add to list functionality in Detail screen to share that you are interested in the product, example screen mockups provided below. ○ Add to list: On clicking add to list button/icon the app makes the following information of the format "{product title} - {price} from {city name from current user location} added to list "shareable through any of the available options like text message apps, social media apps and/or email. Example string: "Bananas - \$0.59 / lb. from Chicago added to list"
Success Criteria	1. Backend: .NET Working APIs retrieving data, use persistence layer of your choice but implement the APIs with best practices. 2. MAUI: First and foremost: Working code using MAUI with Task 1 & 2 completed and with an ability to speak to what you did. 3. Organize and structure the code with architecture, best standards, and practices. Unit tests is a plus. 4. Feel free to add anything additional that you would like.

***Please do share all your code artifacts along with any AI tools or help that were used to complete the assessments (Prompts, Instructions, Skills, Context files).**

API Samples for Reference (JSON Objects also attached) :

Products API (GET):

- Sample Response:

```
[
  {
    "id": 0,
    "imageUrl":
    "https://www.meijer.com/content/dam/meijer/product/0000/00/4011/00/0000004011000\_1\_A1C1\_1200.png",
    "summary": "Fresh bananas, perfect for a healthy snack.",
    "title": "Bananas"
  },
  {
    "id": 1,
    "imageUrl":
    "https://www.meijer.com/content/dam/meijer/product/0000/00/4133/00/0000004133000\_1\_A1C1\_1200.png",
    "summary": "Crisp and sweet Gala apples.",
    "title": "Gala Apples"
  }
]
```

Product Detail API (GET):

- Sample Response with productid = 0:

```
{
  "description": "Fresh bananas, perfect for a healthy snack. Rich in potassium and vitamins.",
  "id": 0,
  "imageUrl":
  "https://www.meijer.com/content/dam/meijer/product/0000/00/4011/00/0000004011000\_1\_A1C1\_1200.png",
  "price": "$0.59/lb",
  "summary": "Fresh bananas, perfect for a healthy snack.",
  "title": "Bananas"
}
```

UI/UX Mockups:

List screen mockup: clicking on each of the list items takes the user to that products detail screen.

Product List		
+	Title 1	
	Img Summary of product 1	//image or placeholder
+		
+	Title 2	
	Img Summary of product 2	
+		
+	Title 3	
	Img Summary of product 3	
+		
	...	

Detail screen mockup:

Product Detail		
+		
		// image or placeholder
	Full Image	
+		
	Title: Product Title	
	Description:	
	Detailed description of the product.	
	Price: \$XX.XX	//optional: price formatting based on product
	[Share]	//button or appropriate UI element
